ONLINE SERVICES AVAILABLE FROM TAYLOR & FRANCIS

 **Scholarly Articles Research Alerting**
SARA is a free email contents alerting service designed to deliver tables of contents for over 1,050 journals of your choice in advance of the printed version. Registering for the service is simple and you can now request to receive alerts by main category, subcategory, title, or keyword. For more information, visit: www.tandf.co.uk/sara

 **CrossRef** is an international active reference linking service. For more information, visit: <http://www.crossref.org>

 **E-Updates:** Register your e-mail address at www.tandf.co.uk/eupdates to receive information on books, journals, and other news within your areas of interest.

Online Access: Institutional subscribers to the print version of the journal can enjoy FREE online access. Online-only access is also offered for 2006. For further information, visit: www.tandf.co.uk/online.

Now printing eight issues annually, this international journal publishes original research in fundamental and applied aspects of dispersions, emulsions, vesicles, microemulsions, liquid crystals, particle suspensions, and sol-gel processes. Fundamental areas that are covered include:

- new surfactants, polymers, and indigenous stabilizers
- surfactant and polymer association
- phase equilibria in systems water and oil
- surfactant and polymer films, monolayers, and interfacial films
- adsorption and desorption onto solid surfaces
- stability and destabilization of dispersions, emulsions, and particle suspensions
- colloidal templates and sol-gel processing

Industrial applications cover chemicals (surfactants, polymers, stabilizers, inhibitors), crude oils, food, pharmaceuticals, agriculture, nanotechnology, and soft condensed materials.

The journal publishes original research manuscripts, review articles, and letters to the editor. In addition, it contains book reviews and information about relevant conferences.
